- Establishing the European Entrepreneurial school for 21st century
In combination with the model, the YEDAC develops a didactic teaching model, which can be of universal usage in schools all over Europe.

Why Entrepreneurship Education?

To ensure its economy remains globally competitive, a more entrepreneurial culture is needed across Europe. Especially young Europeans need to be more inspired to find and develop their “Entrepreneurial Mindset”.

The European 2020 Action Plan documents that the number of young people leaving school with a specialized education in entrepreneurship is much more likely and quicker to start-up a new business. Hence, there is really good reason to ensure better quality in regards to teaching methods and get inspired from the most updated teaching models.
Aims and objectives

• To stimulate innovative and entrepreneurial mindsets among young people by teaching methods and tools which develop innovative skills and entrepreneurial competences
• To integrate entrepreneurial teaching in different teaching subjects
• To develop tools that can support teachers in entrepreneurial teaching
• To introduce teachers to use the trans-European didactic entrepreneurial model
• To produce materials and a website to support the trans-European use of the developed model and to secure its sustainability
• To produce knowledge and establish political awareness of the importance of entrepreneurship education

Target groups

To achieve the project aims, the YEDAC project will develop a set of learning tools which will target the following groups:

• Teachers in the lower secondary school
• Pupils in the lower secondary school
Actions to be taken

• Development and redesign of tools and methods which are known to increase innovative competences and an entrepreneurial behavior into a trans-European didactic entrepreneurial model

• Training teachers to use the model and to test it in practice for possible fine-tuning and improvements

• Evaluation of the model and assessment of the learning outcome

• Production of a teachers’ handbook, a teachers’ website, a 2.0 website for pupils including video production to support the trans-European use of the developed model and to secure its sustainability

• Securing a widespread introduction of the trans-European didactic entrepreneurial model through national conferences in partner countries

• Formulating and presenting Policy recommendations for educational strategies to support trans-European entrepreneurship education and to support European integration and cross-border cooperation
